

THE WEEKLY HOME & VILLA MAGAZINE

Aurevia Living

SUE-01 / 3 OCTOBER 2026

Comfortable Luxury

A better home, every day.

**PLAN YOUR LIVING ROOM / GET THE LIGHT RIGHT
A MATERIAL PALETTE / YOUR WEEKEND MAKEOVER**

AI-generated design concept

FROM THE FOUNDER

Beautiful rooms. Better everyday living.

Welcome to the first weekly issue of Aurevia Living.

Dear reader,

A home should feel good on an ordinary day. A chair where you can read, a clear route through the room and lighting that suits the evening can matter as much as a beautiful finish.

This issue turns comfortable luxury into useful steps. Explore a measured example layout, build a lighting plan and choose materials you can maintain.

Start with one corner. Try the change, live with it and let your family decide what works.

YOUR GUIDE THIS WEEK

03 Five details that change a room

04 A measured living-room layout

05 Three layers of useful light

06 Materials + a buying shortlist

07 Before / after: a weekend reset

08 Connect with Aurevia

STEAL THE IDEA

Five details. One calmer room.

Use the look as inspiration, then adapt it to your own home.

AI-generated design concept; numbered details are editorial annotations.

01 / Softer seating

Try the seat in person. Check support, depth and washable or removable covers.

03 / A rounded table

Tape its footprint on the floor. Leave a usable gap to the sofa and keep the main route clear.

05 / Texture, in moderation

Repeat two or three finishes. Check rug edges, cleaning needs and furniture stability.

02 / Curtain layers

Use sheers for softened daylight and a separate layer for privacy. Test the sample at your window.

04 / Closed storage

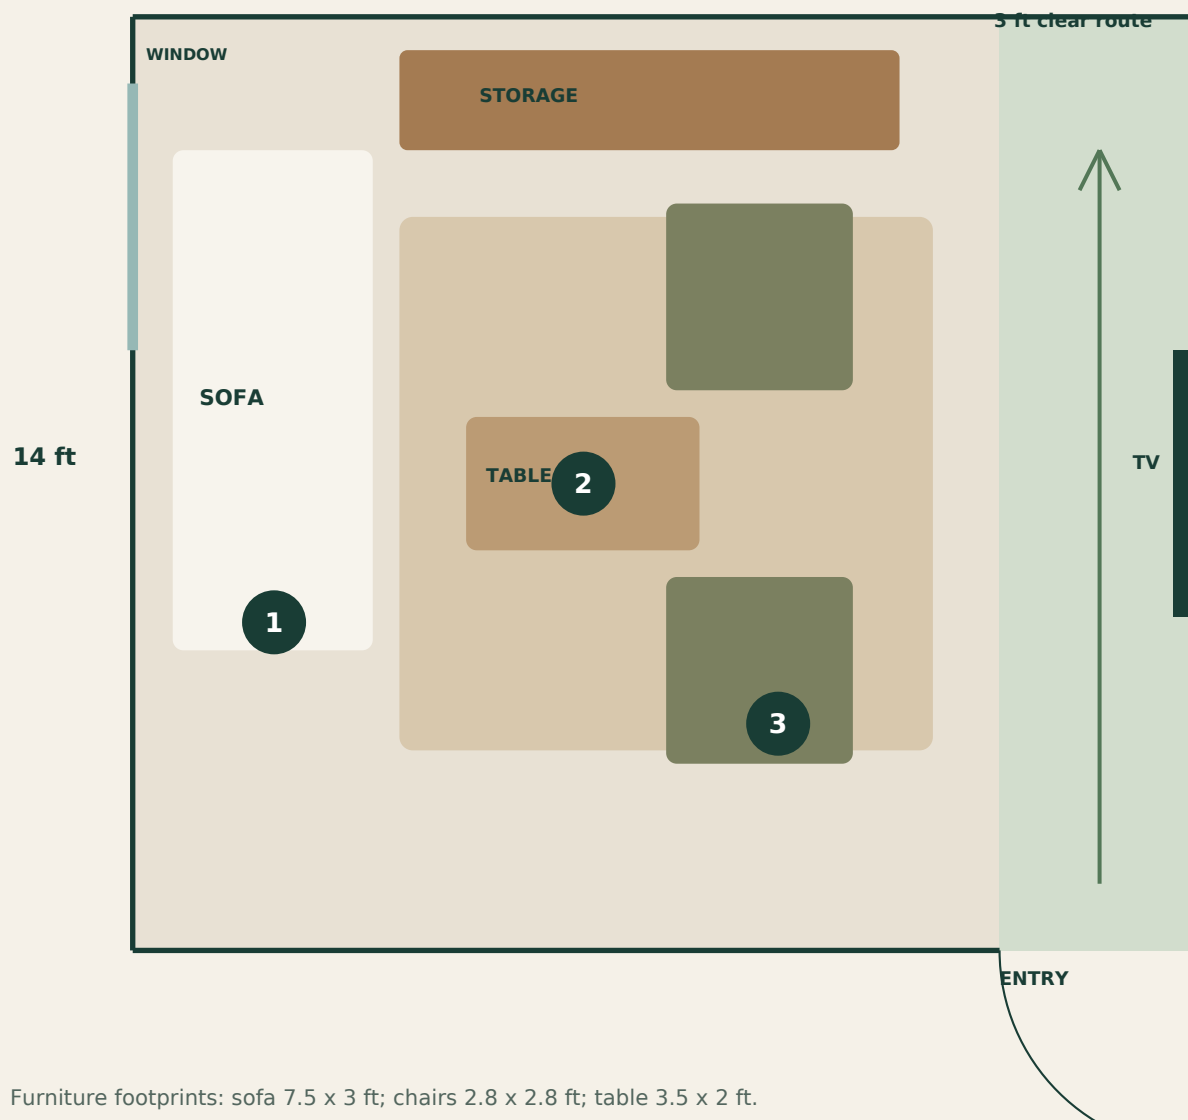

Give remotes, chargers and everyday papers one accessible place. Measure the items first.

ROOM PLANNING

Make space before you shop.

An illustrative 16 ft x 14 ft room (about 4.88 m x 4.27 m).

16 ft / 4.88 m

Furniture footprints: sofa 7.5 x 3 ft; chairs 2.8 x 2.8 ft; table 3.5 x 2 ft.

1 Tape it out

Mark the sofa and table on the floor. This example leaves 1.4 ft (427 mm) between them.

2 Walk the route

The shaded strip is 3 ft (914 mm) wide. Check your household's actual access needs.

3 Test the seat

Sit where the chair will go. Reach the table and check the view before paying.

Example only: confirm room measurements, door swing, sockets and access requirements. This is a planning exercise, not a site-specific drawing or accessibility specification.

COMFORT AFTER SUNSET

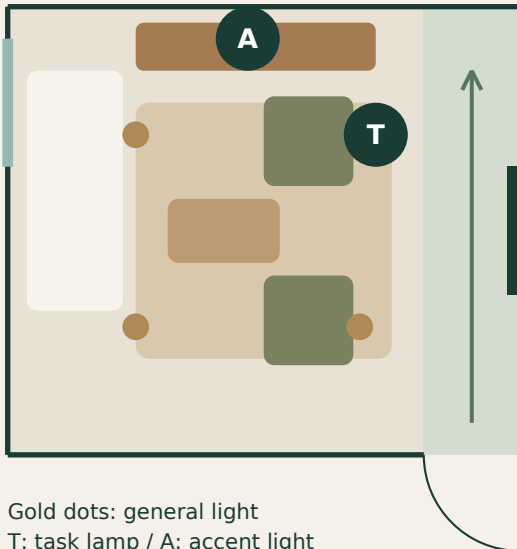

Three layers. Three useful jobs.

Build the light around the activities, then test it from the sofa.

AI-generated design concept

SCHEMATIC LIGHT POSITIONS

Gold dots: general light
T: task lamp / A: accent light

01 / General

Distribute background light so the room is usable. The dots show an example, not a required fitting count.

02 / Task

Place a shaded reading lamp beside the chair. Try it with a book; move it if you see glare.

03 / Accent

A small light at the sideboard can create a softer evening mood. Keep it separately controlled.

BUYING CHECK: LIGHT, NOT JUST WATTS

Compare lumens for brightness. Lower Kelvin values look warmer; try a 2700-3000 K sample for this palette. Confirm the exact LED and dimmer combination with the supplier before installation.

Source: U.S. Department of Energy, Consumer Guide to Energy-Efficient Lighting (2021); see p. 8. Permanent wiring and control changes require a qualified electrician.

SHOP THE IDEA

Texture first. Details second.

A considered palette and a shortlist you can take to a showroom.

AI-generated material concept; samples do not represent specific products.

Warm ivory

Olive

Oak

Pale stone

Brass

Sofa

Example: 2290 x 915 mm footprint. Confirm delivery access; sit-test support and seat depth.

Side table

Try a 400-500 mm top. Choose height near the chair arm; check reach, stability and cleanability.

Reading lamp

Choose a stable base, shaded light and reachable switch. Check cable route and replaceable light source.

Curtains + rug

Measure your actual window and seating group. Test colour at home; inspect care labels and rug edges.

Before paying: confirm dimensions, finish samples, total price, installation, return terms and local service. No paid placements or affiliate purchase links appear in this issue.

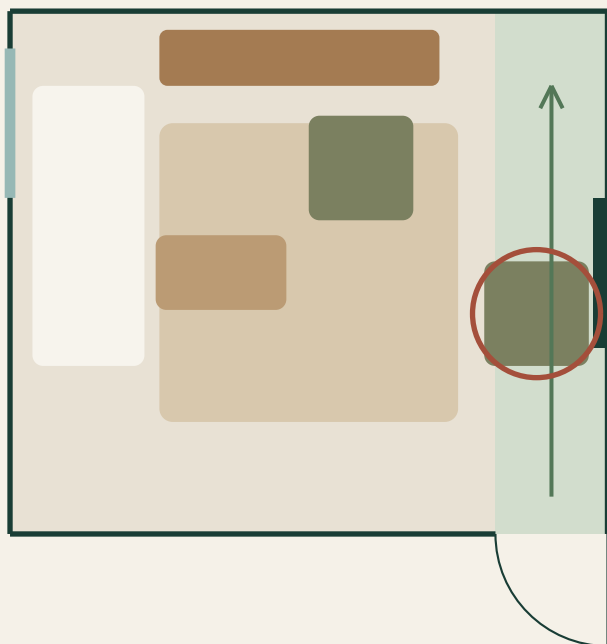

TRY IT AT HOME

A better layout. Same furniture.

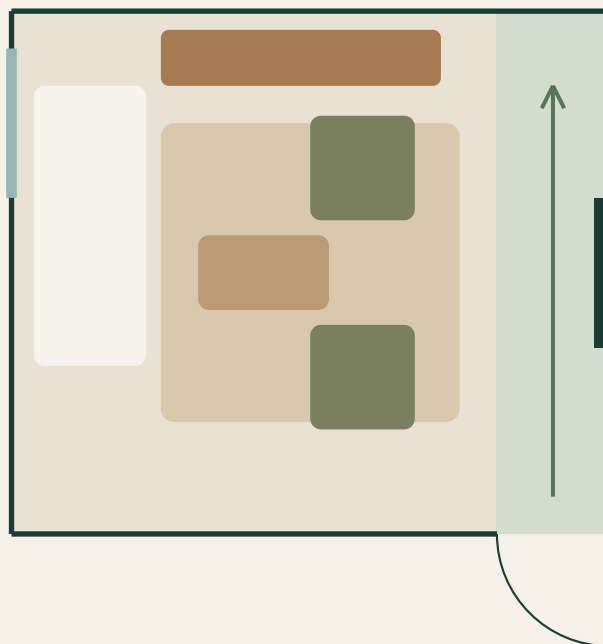

A concept comparison: free the walking route before adding anything new.

BEFORE / ROUTE BLOCKED

AFTER / ROUTE CLEAR

A chair interrupts the shaded route.
The table sits very close to the sofa.

Move the chair into the seating group.
Shift the table to create breathing room.

YOUR FOUR-STEP RESET

15 min

Notice the friction

Carry a tray through the room. Note where you squeeze past furniture or lose a place to put it.

20 min

Clear the surfaces

Sort remotes, chargers and papers. Keep daily items together in one accessible drawer or basket.

30 min

Move and test

Tape the new positions first. With suitable help, move furniture; check doors, cables and rug edges.

7 days

Live with the change

Take matching before and after photos. Ask the family what improved before buying another item.

Concept plans, not photographs of a completed makeover. Avoid heavy lifting without suitable help; leave wiring changes to an electrician.

AI-generated design concept

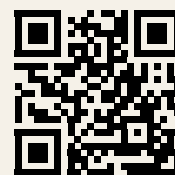

Make home feel better.
